

AUTODESK TAKEOFF

Autodesk Takeoff Bolt On

Deliverable

Autodesk Takeoff Bolt On is an additional service to add cloud-based quantity take off functionality to your Autodesk Docs deployment. Besides the provision of Autodesk Takeoff, our technical experts will help with:

- Administrative Best Practice and Overview
- 2D and 3D Takeoff User Overview

Requires an Autodesk Docs Configuration, either pre-existing or via our Autodesk Docs Base Deployment Service.

Administration Overview **1-2 Hours**

This training session will cover the following:

- Cloud-Based Quantification Overview
- Project Administration
- Adding Members and Configuration Access
- Classification Systems and Units
- Custom Project Template Configuration

Takeoff Overview **3 - 4 Hours**

This training includes the following subjects:

- Setting up a Project (*Packages, Takeoff Types, Classifications*)
- Project Settings
- Working with 2D Sheets (*Upload and Viewing*)
- Working with 3D Models (*Upload and Viewing*)
- Performing 2D Takeoffs
- Performing 3D Takeoffs
- Assigning Formulae to Takeoffs (*Using Formulae for More Complex Takeoffs*)
- Using Packages to Create Detailed Takeoffs
- Inventory Management (*Exporting to Excel*)
