

Revit MEP Fundamentals

COURSE DESCRIPTION

Autodesk Revit is the leading Building Information Modelling (BIM) tool used to design, document, visualise, collaborate and simulate projects for building services engineers. Revit's BIM capability is used to streamline the design and analysis process and improve collaboration among project teams. You'll learn how to draw and modify Mechanical, Electrical and Plumbing elements in 3D using the toolsets. We will show you how to extract information from the Building Information Model to create schedules and basics take-offs. Sheet publication is covered in detail to ensure you can take your 3D models and use them to develop 2D published sheets or drawings.

COURSE MODULES

- Introduction to BIM
- Introduction to Autodesk Revit
- Basic Sketching Tools
- Basic Modify Tools
- Starting System Projects
- Working with Views
- Setting up Spaces
- Heating and Cooling Loads Analysis
- Basic System Tools
- HVAC Networks
- Plumbing Networks
- Electrical Systems
- Creating Construction Documents
- Annotating Construction Documents
- Adding Tags and Schedules
